

Salam & Hi everyone, with regard to assignment, it was my initial arrangement to make you present your work in front of me so that I would see directly at your big effort doing the assignment. Unfortunately, due to time constraints, I really need to change the strategy so that you only need to create a video presentation containing screen recording of the work via e.g. CamStudio, Ezvid, Screencast-O-Matic, etc.

In the video, please include how the application works and concluded with how the application adds value to the organization. The duration should not exceed 6 minutes. Next, one of your group members needs to upload to YouTube and send the url to ecampus together with the list of the group member. The due date for video is on 23th May 2019.

There is no change for softcopy MS Access submission in which each member need to upload to ecampus. While for hardcopy submission, please do come to my cabin (CB1) to submit.

p.s. if you insist to present, you can do so few days before the end of the semester and make an appointment accordingly. Groups that have already present can ignore this message.

Sincerely,

Zul Karami Che Musa
